

MoveMint

MEMECOIN LAUNCHPAD

A cleaner memecoin launch platform
built on Aptos.

The Rise of Memecoins

From Dogecoin joke to
billion-dollar ecosystems.

\$60B+

Total memecoin market cap at peak (2024)

1M+

Tokens launched on Pump.fun in first year

500%

Growth in memecoin trading volume, 2023–2024

#1

Pump.fun became Solana's top revenue generator

Chaos in the Current Ecosystem

Rug Pulls & Scams

Over 40% of launched tokens are abandoned within 48 hours. No accountability mechanisms.

Solana Congestion

Network bottlenecks during high-volume launches. Failed transactions, frustrated users.

Unfair Price Discovery

Insider buys before public launch. Bots front-run retail traders at token genesis.

No Liquidity Guarantees

Founders drain liquidity pools post-launch. Investors left holding worthless tokens.

The market is ready for a
structured alternative.

01

Multi-Chain Demand

Traders want memecoin culture outside Solana's congestion.

02

Fairness Premium

Communities reward platforms that enforce launch fairness.

03

Ecosystem Growth

Aptos is investing heavily in DeFi and consumer apps.

PRODUCT

Introducing **MoveMint**

Fair. Transparent. Built on Aptos.

A memecoin launchpad that replaces speculation
with structure — using bonding curves to make
every launch fair and every price discoverable.

BLOCKCHAIN

Aptos

CONTRACT

Move Language

MODEL

Bonding Curve

LAUNCH FEE

0.2 APT

STATUS

Live on Testnet

Everything you need to launch.

Token Launch

Create a memecoin in seconds.
0.2 APT flat fee. No coding required.

Bonding Curve Trading

Prices set algorithmically.
Fair entry for every buyer.

Auto-Graduation

Tokens graduate to DEX
when 1,283 APT is raised.

Locked Liquidity

LP tokens permanently locked.
No rug pulls possible.

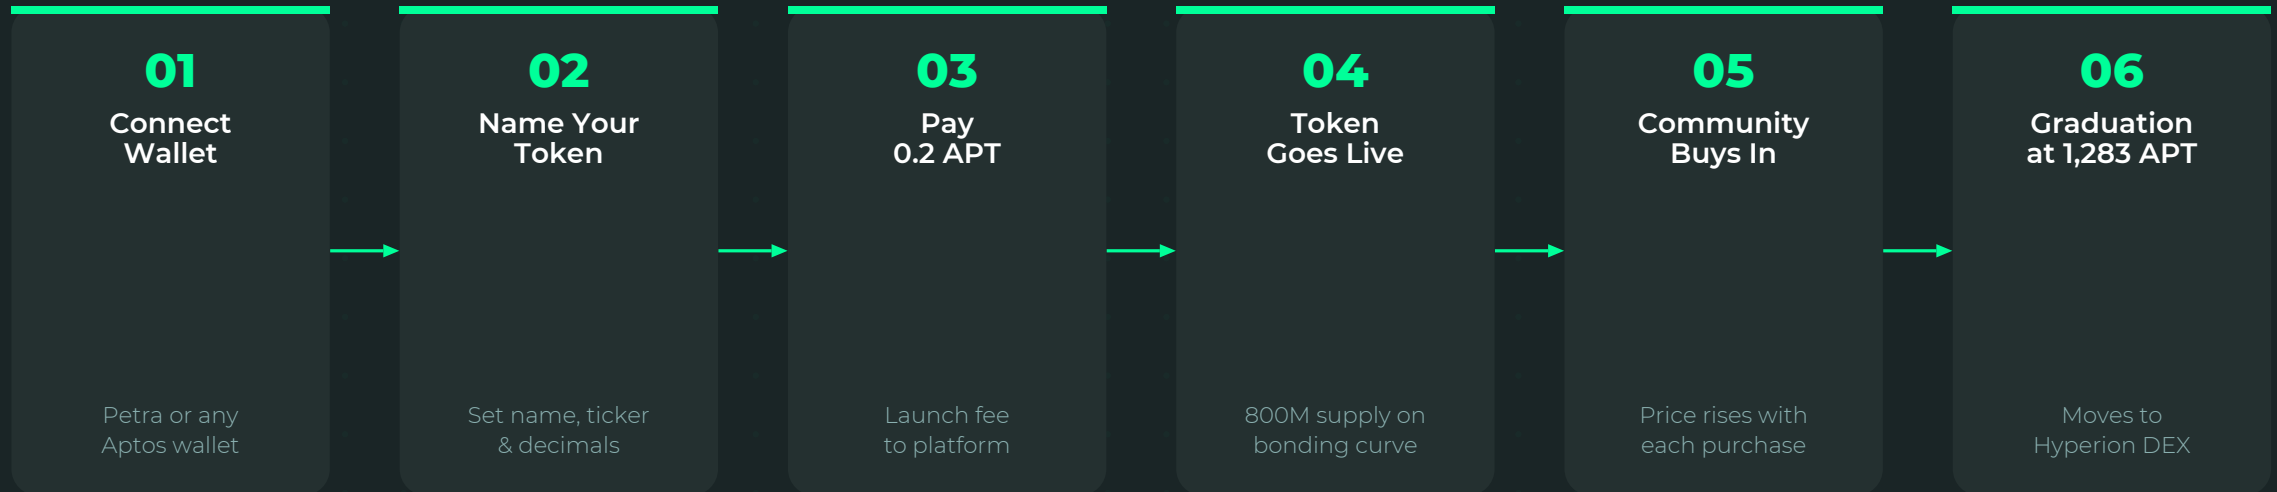

Multi-Wallet Support

Petra, Martian, MizuWallet
and more.

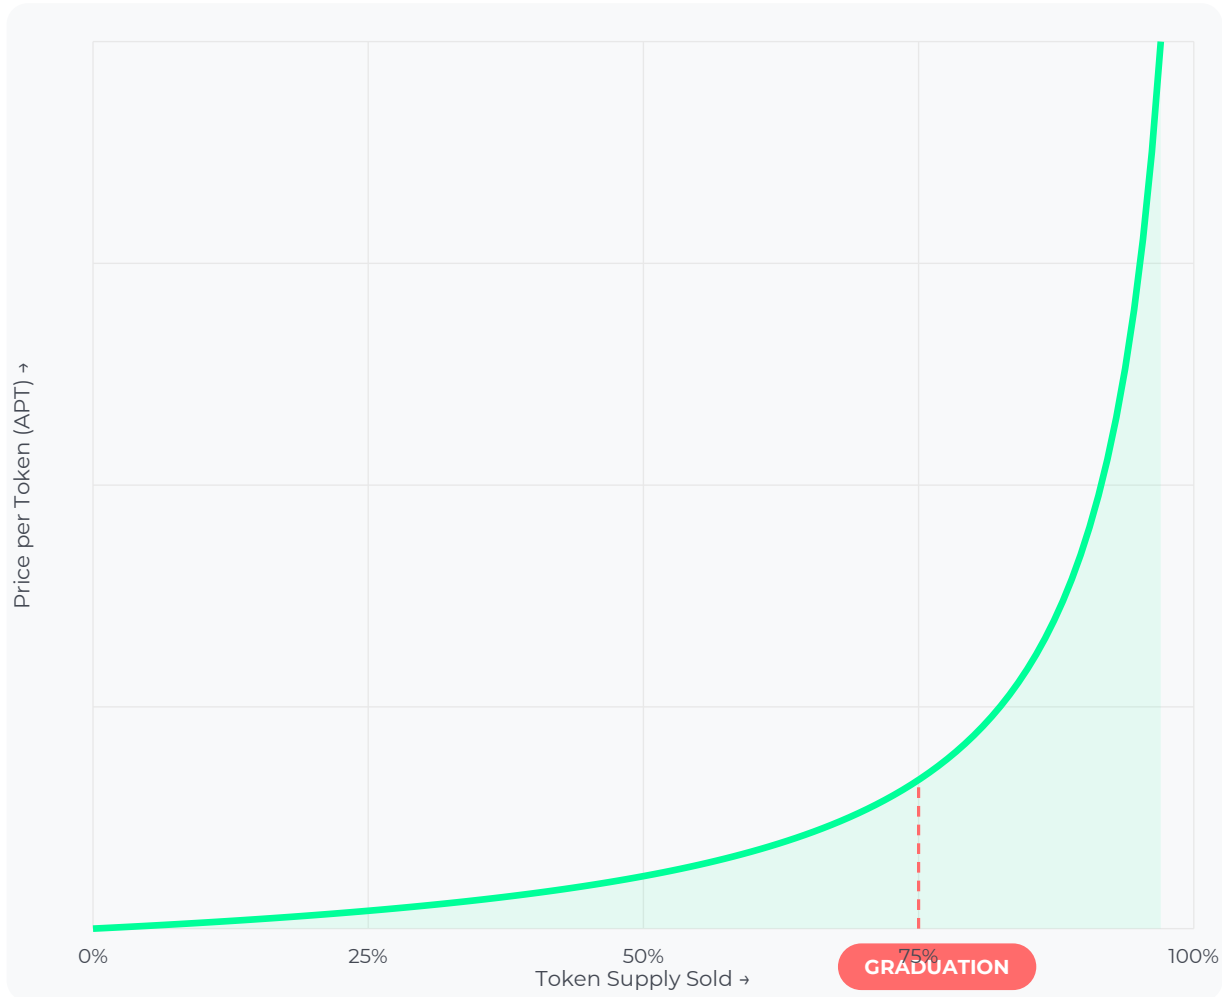

Live Price Charts

Real-time bonding curve charts.
Full trading history.

How a Token Launch Works

Bonding Curve Pricing

Hyperbolic Formula

$$\text{Price} = 19,029,514,756 / (800\text{M} - \text{sold}) + 61.9$$

Price rises as supply depletes.

Floor Price

~62 Octas at launch

Always a minimum non-zero entry price.

Fair Averaging

$$\text{Cost} = \text{avg}(\text{price_before}, \text{price_after}) \times \text{qty}$$

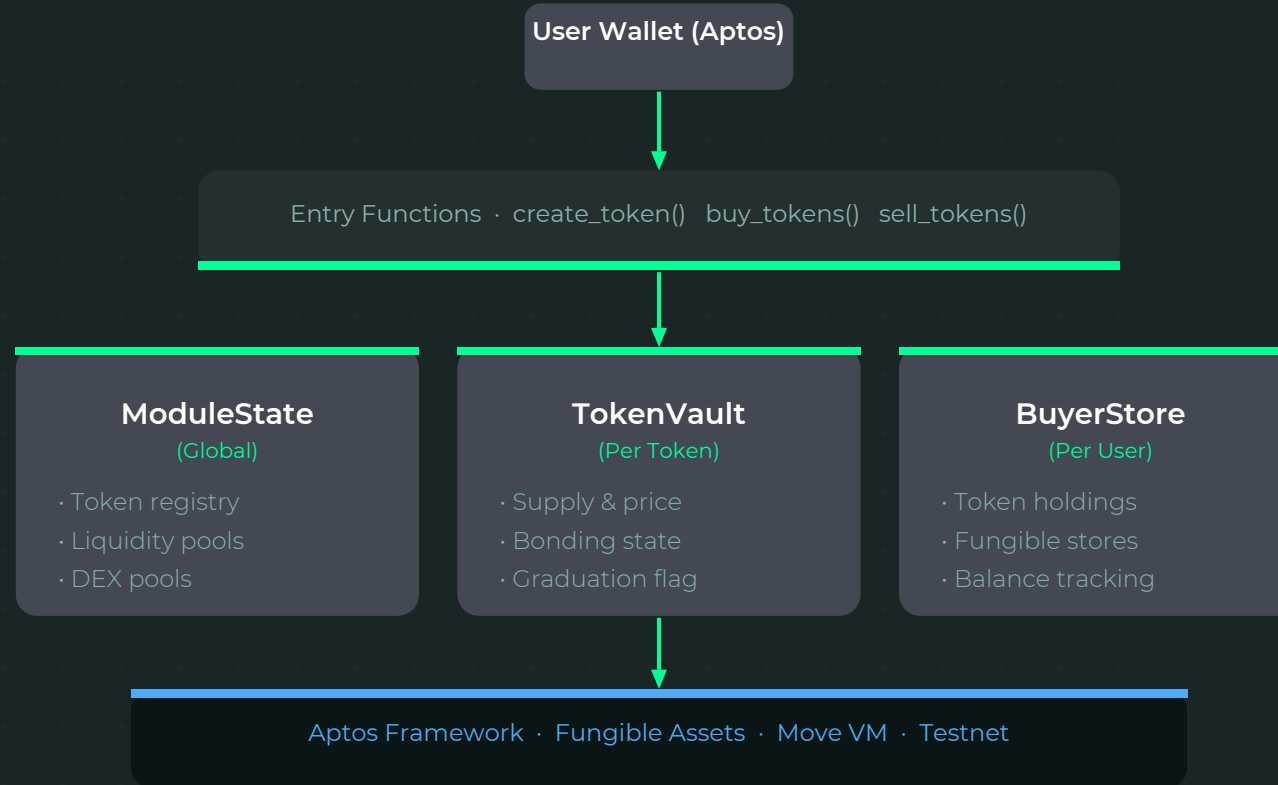

No single-block front-running advantage.

Auto-Graduation

Triggers at 1,283 APT raised

Token moves to live DEX pool automatically.

Smart Contract Architecture

Built for traders. Designed for clarity.

Why Aptos?

Sub-Second Finality

160,000+ TPS with Block-STM parallel execution.
Transactions confirm in < 1 second.

Move Language

Resource-oriented programming prevents
reentrancy, overflow, and asset duplication.

Growing DeFi Ecosystem

Aptos DeFi TVL grew 400% in 2024.
Hyperion, Liquidswap, and Echelon leading.

Underserved Memecoin Market

Minimal memecoin infrastructure on Aptos.
First-mover advantage for a launchpad.

Foundation Support

Aptos Foundation actively funds ecosystem
builders with grants up to \$500K.

Consumer App Focus

Aptos increasingly targets consumer apps
with mobile-first developer tooling.

Token launchpad SDK

Community token voting

Why MoveMint matters.

01

Market Timing

Memecoins are not a fad — they're a permanent feature of crypto culture. The infrastructure race is just beginning.

02

Fair Launch Economics

Bonding curves eliminate insider advantage. MoveMint makes price discovery transparent and manipulation-resistant.

03

Aptos Advantage

Aptos offers speed, safety, and an underserved audience. MoveMint is positioned as the first serious memecoin launchpad on the chain.

04

Composable Architecture

Move smart contracts, auto-graduation, and locked liquidity combine into a trustless, fully on-chain product.
